

Son Akşam Yemeği

Leonardo da Vinci · 1495–1498 · Santa Maria delle Grazie yemekhanesi, Milano

Bu kitle eserin içinde dolaşan, başı ve sonu aynı karede birleşen **20 saniyelik yatay 16:9 bir döngü videosu** üretebilirsin. İçinde: ① üretim adımları ② Seedance promptu ③ tablonun hikâyesi. Eserin orijinal görselini kit sayfasındaki **"Eser orijinal kare indir"** düğmesinden ayrıca indirebilirsin.

Döngüyü nasıl üretirsin?

1. **Modeli seç.** Başlangıç ve bitiş karesi verilebilen bir görselden video modeli kullan. Biz **Seedance 2.5** ile çalışıyoruz (ör. Higgsfield'de "omni reference" modu).
2. **Eserin orijinal görselini iki kez yükle:** hem başlangıç hem bitiş karesi olarak. Döngüyü bu sağlar. Görsel seçtiğin orana uymazsa model kenarları kendisi tamamlar; istersen önce görseli orana göre kırabilirsin.
3. **Ayarlar:** oran **16:9**, süre **20 sn**, **ses kapalı**. İlk denemeyi düşük çözünürlükte yap; rota beğenilirse yükselt.
4. **Promptu yapıştır** (sonraki sayfa) ve üret. Değiştirmeden kullan.
5. **Kontrol et:** son kare ilk kareyle aynı mı? Figürler değişti mi, yeni nesne çıktı mı? Videoyu iki kez art arda izle; ek yerini fark etmiyorsan hazır.
6. **Gerekirse kırp:** sondaki fazla duraklamayı kes; doruk anını (yavaşlanan yer) kısaltma.

Kredi notu. 7 Ekim 2026'da Higgsfield'de Seedance 2.5 ile 20 sn yaklaşık 480p: 60, 720p: 140, 1080p: 240 kredi tutuyordu. Fiyatlar değişebilir; sonuçlar modele göre değişir, birkaç deneme gerekebilir.

PROMPTUN MANTIĞI

Giriş: ilk ve son kare aynı, tek kesintisiz kamera yolu. · 3B kuralı: tablo gerçek bir mekân gibi kurulur ama boya dokusu korunur. · Eseri koru: figürler kıpırdamaz, yalnız kamera hareket eder. · Zaman blokları: yakın ayrıntı → yükseliş → **doruk** (yavaşlama) → mekânın derinliği → ilk kareye dönüş. · Yasaklar: kesme, ani zoom, yeni kişi/eşya yok. Kendi tablona uyarlarken bu sırayı koru.

Olduğu gibi kopyala, yapıştır

Create a 20-second horizontal 16:9 image-to-video film, using the supplied image as the exact first frame and matching final frame. One continuous camera journey through Leonardo's refectory room, with macro detail along the table, a quiet emotional peak at the central figure and a seamless return.

Build the supplied scene as complete 3D geometry while preserving Leonardo da Vinci's painted appearance: the faded, chalky fresco colours, the flaking plaster texture, the soft modelling and the aged surface. The long table and white tablecloth occupy real space, the coffered ceiling and the side walls with dark hangings recede in true perspective toward the three back windows, and all thirteen figures have fully dimensional bodies beneath their robes. As the camera moves, reveal the sides and backs of objects and figures hidden from the frontal viewpoint, matching their visible design.

IDENTIFY AND PRESERVE THE FIGURES

Thirteen men sit behind one long table, all facing the viewer's side, arranged in four groups of three around the central figure.

The central figure sits alone in the middle in front of the middle window, wearing a red robe with a blue mantle over his left shoulder, head tilted slightly, eyes lowered, both arms spread open on the table. The bright window and landscape frame his head.

To his right (screen-left): a young man with long hair leaning away toward an older bearded man who speaks into his ear; in front of them a dark-faced man leans back, clutching a small pouch, his elbow near a tipped-over salt cellar; a hand holding a knife rests behind him.

To his left (screen-right): a man with a raised index finger, a man with both arms flung wide, and a man with hands on his chest leaning toward the centre.

At both ends: three figures on the far left and three on the far right, gesturing and turned toward each other.

Every figure keeps his exact pose, gesture, face and costume colour. No one moves, stands or changes expression. The count stays exactly thirteen.

0-3 SECONDS – ENTER ACROSS THE TABLE EDGE

Hold the exact supplied image for about half a second.

The camera then moves forward and descends to the front edge of the white tablecloth, just left of centre, and glides low across the table surface.

At macro distance, reveal the woven linen with its pale blue embroidered stripes, its folds hanging over the edge, and the small bread rolls, glass tumblers and pewter plates as rounded objects with real thickness. The nearest roll passes softly out of focus beneath the lens. The figures remain farther back, establishing depth immediately.

3-7 SECONDS – ALONG THE TABLE TO THE DARK FIGURE

Travel along the table toward the group on screen-left of the central figure.

Pass the tipped-over salt cellar and the hand clutching the small pouch. Reveal the gap between the leaning-back man and the table, the knife-holding hand behind him, and the overlapping layers of robes as dimensional folds: raised crests catch the window light, deeper folds stay in shadow.

Keep a steady forward momentum.

7-10 SECONDS – PAST THE LEANING YOUNG MAN

Rise smoothly past the shoulder of the long-haired young man leaning toward screen-left. Reveal the curve of his rose-red robe and the side of his shoulder hidden from the frontal view.

Curve toward the centre of the table. The young man's shoulder crosses the near foreground, the central figure becomes clearer ahead, the side walls shift slowly in the background.

10-14 SECONDS – THE CENTRAL FIGURE

Arrive in front of the central figure at eye level, slightly off-axis.

Reveal the three-dimensional shape of his calm, lowered face, the soft modelling of brow and cheek, the strands of his hair, and the red robe and blue mantle around his open arms. The bright window and distant landscape glow behind his head.

Slow the camera for about one second with only a gentle sideways drift. Let the stillness register. His expression is exactly as painted.

14-17 SECONDS – TOWARD THE RIGHT GROUP AND UP

Continue past his left shoulder along the blue mantle toward the group on screen-right: the raised index finger, the arms flung wide. Pass close beside the raised hand as a soft foreground shape.

Then begin a broad rising retreat: the camera lifts toward the coffered ceiling and pulls back above the table, the whole room opening up again in perspective.

17-20 SECONDS – RETURN TO THE ORIGINAL COMPOSITION

Continue the retreat in one smooth arc back onto the central frontal axis.

Reveal the whole table and all thirteen figures again; align the coffered ceiling, the wall hangings, the three windows, the tablecloth and the doorway at the bottom centre with their positions in the supplied image.

Gently decelerate into the exact opening viewpoint, lens perspective, framing, colour and exposure. End on a frame matching the supplied image so the next repetition flows directly into the opening.

CAMERA, STYLE AND CONTINUITY

One uninterrupted physical camera path: low across the tablecloth, along the table to the left group, past the leaning young man's shoulder, to the central figure's face, past his shoulder to the right group, up toward the ceiling and back to the original frontal view.

Natural motion blur and shallow depth of field during macro passes; transfer focus smoothly to the next detail on the route. Foreground objects pass the lens only because the camera moves around them; no figure changes pose or moves toward the camera.

One coherent room with stable geometry, stable perspective and consistent light from the back windows. Preserve the fresco's faded colour and flaking plaster texture at every scale.

No cuts, crash zooms, dissolves, flat canvas flyovers, wall-relief effects, scene morphing, additional people, new objects, changed faces, changed gestures, extra decoration, text or logos.

Bir cümlenin yarattığı dalga

HANGİ AN?

Leonardo, İsa'nın havarilere "İçinizden biri bana ihanet edecek" dediği anı resmetti. On iki havari üçerli dört grup hâlinde bu cümleye tepki verir: şaşkınlık, inkâr, soru. Merkezdeki figür ise sakin kalır.

NEYİ FARKLI YAPTI?

Eser gerçek bir fresk değildir. Leonardo ıslak sıva yerine kuru duvara tempera ve yağlı boyayla çalıştı; böylece yavaş ve katman katman çalışabildi. Ama boya duvara iyi tutunmadı ve resim daha Leonardo hayattayken bozulmaya başladı.

MEKÂNIN SIRRI

Perspektif çizgileri merkezdeki figürün başında birleşir; bakışımız farkında olmadan oraya çekilir. Tavan, duvar halıları ve arkadaki üç pencere yemekhanenin gerçek mekânını sürdürüyormuş gibi kurulmuştur.

Bir cümle söylenir ve on iki insan aynı anda kendini sorgular; resim o tek saniyeyi beş yüz yıldır durduruyor.

VİDEODA NEYE BAK?

- Masa örtüsünün kıvrımlarına ve ekmeklere: boya dökülmüş, yüzey yorgun.
- Sola doğru eğilen grupta keseyi sıkan ele.
- Kamera merkezde yavaşladığında pencerenin önündeki sakin yüze.
